

RESIDUALS

D-Force™ HPX-15

RESIDUAL WITH DELTAMETHRIN

Above-Ground Spot Treatment Termite Control

Broad Spectrum Insect Control

- Protects Up to 8 Weeks
- Killing Action and Residual Control
- Keeps on Killing For Up to 8 Weeks
- For Indoor/Outdoor Use

KILLS: Ants, Bees, Carpet Beetles, Centipedes, Cockroaches, Crickets, Firebrats, Fleas, Flour Beetles, Grain Beetles, Ground Beetles, Gnats, Midges, Mole Crickets, Moths, Pillbugs, Silverfish, Sowbugs, Spiders, Ticks and Many Other Crawling Insects.

Also Controls and Kills: Wood Infesting Pests - Termites (Subterranean, Formosan & Drywood), Carpenter Ants and Carpenter Bees.

FOR USE IN Food Handling Establishments, Including Food Service, Manufacturing and Processing Establishments, Such as Restaurants, Cafeterias, Supermarkets, Bakeries, Breweries, Dairies, Meat, Poultry & Egg Processing & Packaging Plants, Canneries, Feed Handling Establishments Including Feed Manufacturing and Processing Establishments.

Also For Use In Homes, Tents, Aircraft, Apartments, Atriums, Attics, Automobiles, Basements, Bathrooms, Boats, Bottling facilities, Buses, Cabins, Campers, Candy Plants, Carports, Cat Sleeping Quarters, Clothes Storage, Condominiums, Decks, Dens, Driveways, Garages, Gazebos, Granaries & Grain Mills, Hospitals, Hotels, Industrial Buildings, Kitchens, Laboratories, Lanais, Living Rooms, Mausoleums, Offices, Parlors, Patios, Pet Sleeping Areas, Play Rooms, Porches, Railcars, Recreational Vehicles, Rooms, Schools, Ships & Vessels, Solariums, Storage Areas, Sun Rooms, Trailers, Trucks, Utility Rooms, Verandahs, Warehouses and Wineries.

ACTIVE INGREDIENT:

Deltamethrin.....	0.06%
INERT INGREDIENTS.....	99.94%
	100.00%

KEEP OUT OF REACH OF CHILDREN CAUTION

See Back Panel for Additional Precautionary Statements.

EPA Reg No. 9444- 217 EPA Est. No. 9444-LA-1
U.S. patents pending.

NET WEIGHT 13 lbs. / 5.897 kg.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

Harmful if swallowed or absorbed through skin Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID	
If Inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
If on Skin or Clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
If in Eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If Swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Do not give any liquid to the person. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
HOT LINE NUMBER	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information, call (985) 878-6751, Monday through Friday, 8:00 am to 4:30 pm CST. After 4:30pm call your poison control center. For product information call (203) 597-1812, Monday-Friday, 8:00 am to 5:00 pm EST.	
NOTE TO PHYSICIAN	
Contains petroleum distillate - vomiting may cause aspiration pneumonia.	

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not apply directly to any body of water.

PHYSICAL OR CHEMICAL HAZARDS: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product has residual action which keeps on killing for up to 8 weeks after you spray. Remove pets, birds and cover fish aquariums before spraying. **For Cylinder Applications:** Use appropriate equipment, such as crack & crevice extension tips for voids and wood injectors for wood injection treatments. Place injection tips into cracks, crevices, holes and small openings. Release approximately one-second of product. Repeat as necessary. Several holes may be required in long-running voids. Do not spray up into air. Remove protective cap and direct spray away from face. **INDOOR AND OUTDOOR TREATMENTS – INDOORS:** Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), ants, booklice, boxelder bugs, centipedes, crickets, dermestids, firebrats, fleas palmetto bugs, silverfish, sowbugs, ticks and waterbugs; Apply thoroughly to all areas where these pests crawl and hide, especially in cracks and crevices, and hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. When pests are driven out, spray directly. **Ants:** Spray freely around ant

trails, doors and windows and other places where ants enter the house. **Spiders:** Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl. Centipedes, Ground Beetles, Pillbugs, Sowbugs and Ticks: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found. **[SILVERFISH, CRICKETS, SPIDERS:** Apply to areas infested by these pests or spray pests directly.] **Food/Feed Handling Establishments:** For control of all labeled pests, applications are permitted in food/feed and non-food/non-feed areas of food/feed handling and processing establishments as a general surface, spot or crack and crevice treatment. 1 second spray per spot. This product is authorized for use in Federally Inspected Meat and Poultry Plants as a crack and crevice treatment. Do not use in commercial food/feed handling establishments, restaurants, or other commercial establishments while food is commercially prepared, processed, or served. In the home, all food processing surfaces should be covered during treatment or thoroughly washed before use. Exposed food/feed should be covered or removed. Food/Feed handling establishments are defined as places other than private residences in which exposed food/feed is held, processed, prepared or served. Included also are areas for receiving, storing, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups) of food/feed. Serving areas where food/feed is exposed and the facility is in operation are also considered food/feed areas.

Non-Food/Non-Feed Areas: Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling). All areas that insects inhabit or through which insects may enter should be treated. **Spot or Crack & Crevice Applications:** Except in federally inspected meat and poultry plants, spot or crack and crevice applications may be made while the facility is in operation provided exposed food is covered or removed from area being treated prior to application. **WOOD INFESTING INSECTS:** Termites (Subterranean, Formosan and Drywood)- For control of above-ground termites in localized areas, apply to voids and galleries in damaged wood, and in spaces between wooden structural members and between the sill plate and foundation where wood is vulnerable. Applications may be made to inaccessible areas by drilling, and then injecting with the supplied void injector into the damaged wood or wall voids. These application are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement for controlling active infestations of subterranean termites. Termite carton nests in building voids may be injected using a void injector. It is desirable to physically remove carton nest material from building voids when such nests are found. This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects. Application to attics, crawl spaces, unfinished basements, or manmade voids may be sprayed to control exposed worker and winged reproductive forms of termites. For control of swarming or reproductive stages of termites, spray to the swarm or area on which they collect. The purpose of such applications of this product is to kill workers or winged reproductive forms which may be present at the time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. This product is not recommended as sole protection against termites. For active indoor termite infestations, get a professional inspection. **TERMITES AND CARPENTER ANTS LIVING INSIDE TREES, UTILITY POLES AND FENCING:** For control of above-ground termites inside trees, utility poles, fencing and decking materials and similar structural members, treat open holes or drill to find the interior infested cavity and spray using void injector. **AERIAL TERMITE CARTON IN TREES:** Termite carton nests in trees may be spray injected with product using the supplied void injector. Multiple injection points to varying depths may be necessary. It is desirable to physically remove carton nest material from trees when such nests are found. **Carpenter Ants:** For effective control in houses and other structures, apply as general surface, spot, crack and crevice or wall void application. Apply around doors and windows and other places where ants may enter the premises and where they crawl and hide. Spray into cracks and crevices or through small drilled holes into voids where these ants or their nests are present. For control of carpenter bees in structures, spray the liquid directly into gallery entrance holes. Following treatment, the entrance holes may be left open 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.

STORAGE & DISPOSAL

STORAGE: Do not store near heat or open flame. Store in a cool, dry area away from children. **CONTAINER DISPOSAL:** Replace cap, wrap container in several layers of newspaper and discard in trash. Do not incinerate or puncture. Can may be disposed of with other recyclables where local law permits. **NOTICE:** Buyer assumes all responsibility for safety and use not in accordance with directions.
